

# Installing a Theme from the Marketplace

The screenshot displays the LemonStand marketplace interface. At the top, the LemonStand logo is on the left, and navigation links for Tour, Partners, Marketplace, Gallery, Help, Blog, My Account, and a Free Trial button are on the right. A user is logged in as Cameron Johnson. The main content area is titled 'Marketplace' and features a search bar, a sidebar with category filters (Modules, Themes, Shipping modules, Payment modules, Marketing modules, Utility Modules, Other modules, Merchandising, Ideas), and a product listing for the 'Zest (Twig)' theme. The theme details include its version (1.4), download count (60), and a 'FREE Add to Account' button. A carousel of theme preview images is shown, followed by a description of the theme's features and a list of specific capabilities.

Let's hear from you ☎ (604) 558-0555 ✉ sales@lemonstand.com

### Zest (Twig) By LemonStand

Added: April, 03, 2013  
Version: 1.4 - [view changelog](#)  
Downloads: 60

**FREE** | [Add to Account](#)

A clean responsive theme based on the [Foundation 3](#) framework. The theme uses Twig as the template language which makes the code simpler and less verbose. You can also download the [PHP-based version](#) of the theme.

#### Features

- Combined Billing Address and Shipping Address checkout steps.
- [Combined Review and Pay checkout steps.](#)
- Option Matrix support.
- Product search.
- Shipping cost estimation tool.
- Customer order list.
- [Improved password reset implementation.](#)
- Customer profile management. The customer profile page is based on the new [shop:customer\\_profile](#) CMS action.
- Blog comments are not implemented - you can either use Disqus or add native comments by [following the documentation.](#)
- Clean HTML and CSS code.

Here we have chosen the Zest Twig theme from the LemonStand marketplace to demonstrate how to install a theme to your store.

So from the theme's marketplace page you will want to click the Add to account button. If you aren't already logged in you will be prompted to log in.

The theme has been added to your purchase list. You can download the theme archive from My Account page.

Find the theme under the Themes section in your My Account page. Once you have found it, press the click here link to download the theme. In this case the theme will be downloaded as zest.lca

The screenshot shows the LemonStand CMS interface. At the top, there's a navigation bar with 'CMS' and sub-menus like 'Pages', 'Layouts', 'Partials', 'Content', 'Resources', and 'Themes'. Below this, there's a section for 'Default theme' and 'You are editing' with 'Zest (PHP)' selected. A table lists themes, with 'Zest (PHP)' highlighted. An 'Import theme' modal dialog is open, showing options to upload a file and select a theme to import it into.

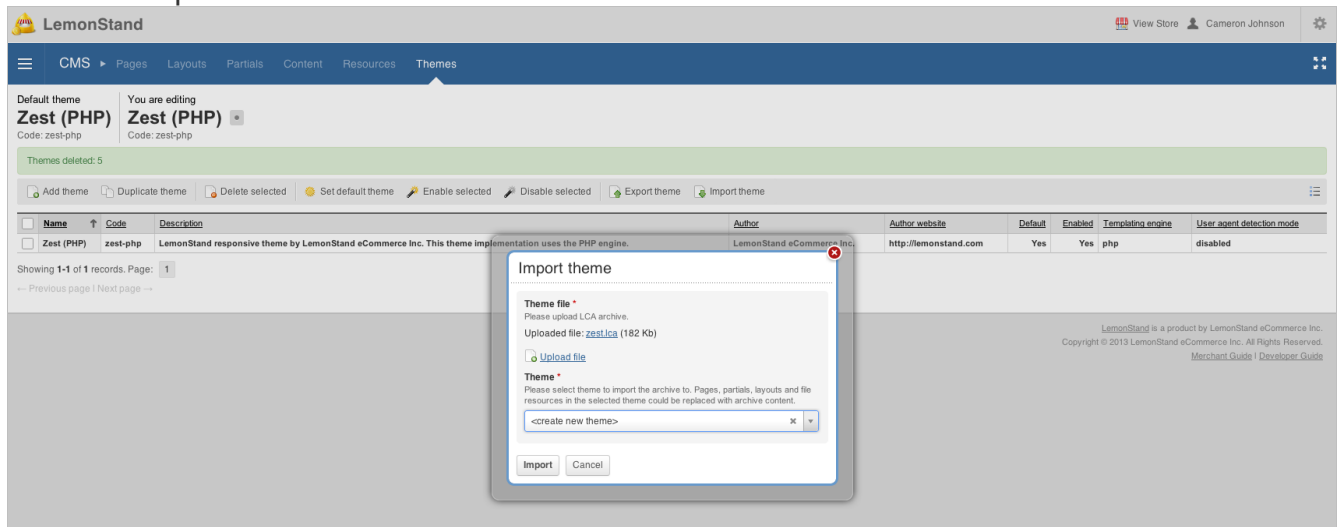

Name	Code	Description	Author	Author website	Default	Enabled	Templating engine	User agent detection mode
Zest (PHP)	zest-php	LemonStand responsive theme by LemonStand eCommerce Inc. This theme implementation uses the PHP engine.	LemonStand eCommerce Inc.	http://lemonstand.com	Yes	Yes	php	disabled

To install the theme into your store you will need to log into the backend of your LemonStand store, and navigate to the CMS->Themes page. Click on the Import Theme button on the far right of the nav bar.

A popup will appear where you can import the theme by click on the Upload file link. Find the .lca file for the theme on your computer.

You can tell the file has been successfully uploaded as it will say the file name and the size above the upload file button.

Next under the Theme heading, you will want to choose <create new theme> from the dropdown box. This tells LemonStand to create a new theme from scratch using the uploaded file. Once you do that click the Import button.

[Merchant Guide](#) | [Developer Guide](#)

If you have another theme already installed in your store, you will have to specify which them you would like to be the default (active) theme. You can do this by clicking the Set default theme in the nav bar.

The screenshot displays the LemonStand CMS interface for managing themes. At the top, the user is logged in as Cameron Johnson. The navigation menu includes CMS, Pages, Layouts, Partials, Content, Resources, and Themes. The current view is the Themes management page. A notification at the top indicates that the theme 'Zest' is now the default theme. Below this, there are action buttons for theme management: Add theme, Duplicate theme, Delete selected, Set default theme, Enable selected, Disable selected, Export theme, and Import theme. A table lists the available themes:

Name	Code	Description	Author	Author website	Default	Enabled	Templating engine	User agent detection mode
Zest	zest	LemonStand responsive theme by LemonStand eCommerce Inc.	LemonStand eCommerce Inc.	http://lemonstand.com	Yes	Yes	twig	disabled
Zest (PHP)	zest-php	LemonStand responsive theme by LemonStand eCommerce Inc. This theme implementation uses the PHP engine.	LemonStand eCommerce Inc.	http://lemonstand.com	No	Yes	php	disabled

Below the table, it shows 'Showing 1-2 of 2 records. Page: 1'. A 'Select theme' dialog box is open, allowing the user to select a theme to edit. The dialog box contains a dropdown menu with 'Zest (zest)' selected and 'Apply' and 'Cancel' buttons. In the bottom right corner, there is a footer with copyright information: 'LemonStand is a product by LemonStand eCommerce Inc. Copyright © 2013 LemonStand eCommerce Inc. All Rights Reserved. Merchant Guide | Developer Guide'.

You will also want to make sure the files you are editing in the CMS pages, partials and layouts are for the correct theme. By click the circle beside the "You are editing \_\_\_\_ " will allow you to see the theme's code.

This is useful is you are switching between themes referencing code, but don't want to actually switch the default theme on your website.
